# Aucton Sale

Wood's Jewelry Store

Harrington Building, Opposite Middle Street

# STARTS THIS EVENING at 7 O'CLOCK

And will be continued for the next week or two. Surplus stock of new goods bought for Christmas trade to be disposed of at your own price. Store must be vacated as it is to be leased. Our new store on the site of the Hamilton wall in Central street, will not be ready until about May 1. The goods in our present store in the Harrington building must either be stored at considerable expense and great trouble or we must dispose of them at auction sale. We prefer the latter, as cut glass and silverware are liable to be broken and tarnished in storage. The auction inaugurated before the holidays was stopped in order to accommodate Christmas buyers. It will be started again this evening for a short time, with the balance of our surplus stock, also the balance of the choice new unsold Christmas goods. Stock to be sold includes 137 choice pieces of Cut Glass, also 150 Clocks of various sizes and designs. A Big Line of Watches, including Walthams, Elgins and Hamiltons. Choicest of our stock of Fancy China, such as Haviland Dinner Sets, etc. Silver Tea Sets and Odd Pieces in Solid Silver and Plated Ware. Handsome Electroliers, Large Japanese Vases. Leather Goods and Mesh Bags, Fobs, Bracelets, Rings, Brooches, Fancy Buckles, Hat Pins, and a hundred and one articles too numerous to mention. It will certainly he to your advantage to attend this auction and carry away some of the goods even if you have to keep them for future use.

Cleorge R. Dann is very husy picking up the ends preparatory to attending the automobile show at Madison Square Garden. New York, Jan. 6-13. Mr. Dana will go ever to New York Standay next, and will spend the entire week at the show. The Stevens-Duryer company will make a most interesting and instructive exhibit; it will not only be an exhibition of various types, finishes and furnishings, but will lay bare for inspection and study the exclusive mechanism of this car in a most comprehensive manner. This show it sort of a twenty-first birthday of the Stevens-Duryea, and in fact, the American Motor car, for it was in the spring of 1851 that J. Frank Duryea took up the problem of power driven carriages and who is the little known American genius that produced the first successful gaseline car built in this country and whose work has unsterielly effected the whole great findustry. It is said that Durees was laughted at, as are most plone(rs. No longer ago than 1905 his 6-cylinder car was regarded as a treak, while today we find his leas have become almost fundamental in mater car construction at home and abroad.

The family of Mr. Harry Danlap are Stevens-Duryea Co, and is a branter.

Although the car was a present of the family, Mr. Danlap Christmas day. The car was purchased of Mr. Dana, local representative of the Stevens-Duryea Co, and is a branter.

surrendered the initiative to the rivish team.

The new rules have built up a game in which offence is negalized and a premium is put upon view defence. That reverses all the traditions of football as a specific the traditions of football as a specific his put upon view defence. Nowadays running with the ball may be entirely neglected and a team causafely trust to blocking in order to defend its goal and wait patiently for a scoring chance until sembledy on the other side fumbles or a try al goal's blocked. The offence is so weighted down that it can hardly ever gain ground within the opposition's 25-yard line, and the result of the handicap is a fruitless exchange of punts in and down the field-sa precedure which becomes exceedingly tirescent to the spectator who choushes the expectation of sceing some incre delivite test between the contending cheens.

The details of progeoid changes in the rules have still to be worked out. But we believe that a view registrity of those interested in for thall will agree that the offence output with the defence in order to discussion in the light were on an equality with the defence in order to discussion in the light were on an equality with the defence in order to discussion in the light were on an equality with the defence in order to discussion in the light were on an equality with the defence in order to discussion in the light were on an equality with the defence in order to have called in the field of the particular to have considered in the defence of the latter of the lat that the offence each to be put more on an equality with the defence in order to reastablish the believe of the game. The number of downs allowed to the attack might be the trained from the attack might be the trained from the offence of the put more to four, or the distance to go reduced from ten yards perhaps to sever or light. Were a straight attack better towarded there would be uned less occusion for elaborating the forward pass and other ground-gaining schemes intended to replace running with the ball. Feedball is now largely a game of chance and individual effort. It ought to be restored to its format status, in which team play, not leapur individual inspiration, was the deciding factor. Let us kope that this year will see a better balanced game replace the deadlocked model of 1911.

If it is One Round Brown of California that Johnny Gover is supposed to meet at Scranton. Par and there is some doubt of him being the real Hogan, the result of the meeting will probably terminate like the Glover-Tommy Celeman match who in the latter knocked out Glover. Up in the oall regions of Pernsylvania they have been working several leaves under assumed names, and it is not at all improbable that One Rould Hogan doesn't know Grything about such a match.

What is looked upon as a very important discussion in the lightweight class, is the meeting carl do tween door Rivers, the Mexcan, who recently forsook the featherweight ranks, and Urankie Contey at Version California today. Rivers is one of the least fittle follows California has deviced in a long widtle.

# SELECT HONE BUT COMPETENT OFFICIALS

The renninger comes it, started off well by doing business as it should be done, it the team new with rapid despatch fills the various offices with competent care at wall wis public commendation. But it it appoints men of a different strong either the capacity of the commissioners or their carrestress to the welfare of the city will be questioned. The fact that a man has a political part should not be considered where the quest is for good, capable, he are most reliable men for all the subordinate offices. The board must provide that the people will look to their for results, and unless the right term are closed to the various offices the best results cannot be attained. The day of the board is clear and imperative.

PROFESSOR ZUEBLIN'S CHARGES

Might we ask how or by whom Professor Zueblin has been constituted the ubiquitous peripatelic mentor of society, the irresponsible censor of men, of government and human affairs in general and especially the blatant denouncer of business men, corporations, newspapers and elergymen?

The people of the Grace church were treated to another fulmination from the "Professor" on Sunday evening and one that while purporting to deal with the commission form of government, dealt also with many side issues; for the professor assuming that he knows everything and that nobody else knows much of anything, can never confine himself to one subject, however great or important it may be. On his last visit to Lowell, just before the municipal primaries, the professor appealed to the women to get out and the municipal primaries. the professor appealed to the women to get out and assert themselves at the polls, and some of them foolishly got excited and hastened to city half to register, with the result that through misunderstand-Ings of various kinds, certain prejudices were aroused; and this, no doubt, is what the professor delights to call "an awakening" among the women.

But in discussing the commission form of government or rather the causes of bad government. Prof. Zuehlin singles out three agencies as responsible for bad government. Every friend of good government will, bf course, rejoice to know what these are in order to help wipe them out-but what are they? Listen in this modern crucle while he reveals, the well springs of the had government of American cities:--

There are those else, as of people," who are chiefly responsible for misgoverno et as the cities ethe business men, the newspapermen, and the clarymen. Spainess men are afraid they will not hold travelessis and so, when they go into person at all, they go sate it 190-her (belly. The newspapers are utrain to tell the truth for fear the advertisers, will curtuin their advertising; and the derivates are at all to tell the truth for their ron-

It would be difficult to compress more falsehood or injustice into the same space than is contained in the above paragraph. It is grossly unjust to the business men, to the newspaper men and the clergymen. We do not believe it will hart any man's historess to come out holdly for clean government, nor do we believe that any business man has been deterred from working for good government by the dread of losing his business. That condition might provail in a community where the masses were marshalled in favor of bad and corrupt government; but such a condition does not exist in It would be difficult to compress more falsehood or injustice into the favor of bad and corrupt government; but such a condition does not exist in testimens, to the fact that the Lowell and never did

The charge that clergymen are afraid to tell the truth lest their congregations "call them down" represents them as verifiable puppets in the thorities. hands of corrupt congregations. Need we say that the facts in our recent | on the people charter agitation belie the charge so far as it applies to local elergymen; for, most of the clergymen recustomed to deal with such matters, have been Mexico outspoken in their denunciation of had government and outhusiastic advocates of the new charter despite the fact that a very considerable portion of their congregations strongly opposed the change. We know of no elergyman so enslaved by his congregation as to be afraid to tell the truth: we have never heard of any Lowell elergyman suffering from felling the truth, but we do believe that the clergyman or the congregation that assumes responsibility for all the charges made by Professor Zueblin has a good deal to answer for.

Professor Zachlin says we do our thinking in the 18th century, but when he asserts that the newspapers are afraid to tell the truth lest they should and good government. lose their advertising patronage, he is not only thinking in the 18th century which he advertises. All he looks for is wide publicity and consequent results, and the paper list would submit to any such interference would soon lose public patronage and he of little use as an advertising medium. Every editor of a live paper knows this, every intelligent advertiser knows it, but some hot air interciants and sociological winit mills who base their opinions upon the conditions surrounding insignificant country papers do not know it. Professor Zuchlin evidently does not lenow it. Yet he says Professor. You really sinck our medesty; and if your opinion on the subject was worth anything we regist teel complimented.

\*\*Notice of the law and allegiance to lawful authority and to strike at the foundation of society, the rights of property and even individual liberty and better on Alexander Register of the lestinance. The date of the paper in a law of the describation of the foundation of particushing and two others and two others had a co-partnership to as country to oppose all movements in that direction, to underly and the conditions of the foundation of society, the rights of property and even individual liberty and ordered cock to pay a fine of \$5.

A rather interesting case was loand to add the two libers on the loans and the other of the administry of the destinance of the law and allegiance to lawful authority and others on Alexander Register of the destinance of the testinance of the two greatest hulwarks of civilization—the form of the conditions surrounding insignificant country papers do not know it. Yet he says there very bone and was be 2 at the foundation of society the first of morning. The description of the foundation of society the first of the foundation of society the rights of property and even the partners, each to increase on the law of the foundation of society the first of the foundation of society the first of the foundation of society the found but lying in the 20th century. Some such condition as he describes might ject was worth anything we might feet complimented.

But now, professor, we may as well let you into one of the scorets of the newspaper business as it exists at least here in New England. If there is anything that deters the average newspaper from telling the truth, it is not the fear of losing advertising but the fear of prejudiced juries grawn from a citizenship into whose minds are instilled the false charges made against the press in general by itinscant political shouters, by erratic proprofessorial savants and self ordained censors of men, morals and political institutions.

Professor Zitchin's ideals of christian character must be very low since he denies even to elernymen the credit of exercising conscience. For the three classes he has mentioned--business men, newspaper men and clergymen-the pocketbook, he says, is the substitute for conscience. Thus he does not concede that any of these classes can be swayed in the slightest Lennox & Sortio 1007 for \$2,000,000 was recalled today by the arnouncebegree by considerations of duty, truth, justice and honor,

When the people are influenced by such erratic leaders it is no wonder they become prejudiced against all large business institutions, as against

CONTINUATION OF THE

# Alction Sale

# Wood's Jewelry Store

Harrington Building, Opposite Middle Street

# STARTS THIS EVENING at 7 O'CLOCK

And will be continued for the next week or two. Surplus stock of new goods bought for Christmas trade to be disposed of at your own price. Store must be vacated as it is to be leased. Our new store on the site of the Hamilton wall in Central street, will not be ready until about May 1. The goods in our present store in the Harrington building must either be stored at considerable expense and great trouble or we must dispose of them at auction sale. We prefer the latter, as cut glass and silverware are liable to be broken and tarnished in storage. The auction inaugurated before the holidays was stopped in order to accommodate Christmas buyers. It will be started again this evening for a short time, with the balance of our surplus stock, also the balance of the choice new unsold Christmas goods. Stock to be sold includes 137 choice pieces of Cut Glass, also 150 Clocks of various sizes and designs. A Big Line of Watches, including Walthams, Elgins and Hamiltons. Choicest of our stock of Fancy China, such as Haviland Dinner Sets, etc. Silver Tea Sets and Odd Pieces in Solid Silver and Plated Ware. Handsome Electroliers, Large Japanese Vases. Leather Goods and Mesh Bags, Fobs, Bracelets, Rings, Brooches, Fancy Buckles, Hat Pins, and a be to your advantage to attend this auction and carry away some of the goods even if you have to keep them for future use.
